Virtual Conference: Government Advances in Statistical Programming (GASP)

Wednesday 14 June – Thursday 15 June 2023

In addition to papers and lightning talks from government, academic, and industry GASPs, highlights of this year's event include the following keynote talks:

- Douglas Bates, Emeritus Professor of Statistics, University of Wisconsin – Madison, "An insider's view of the history of open-source software for data science"
- Cynthia Rudin, Earl D. McLean, Jr. Professor of Computer Science and Engineering at Duke University and Director of the Interpretable Machine Learning Lab

A pre-conference workshop will be offered on 15 June 10:30 am by Benjamin Rogers (NCHS/CDC) and Travis Hoppe (NCHS/CDC) "ChatGPT: A first-look at the utility and risks of Large Language Models (LLMs) for federal agencies."

The American Statistical Association is hosting the conference on its Zoom platform. Please register (no cost) in advance for each day and/or the workshop; you will receive a separate Zoom link for each.
